

Long Island House on Sylt Island Germany

Comparable to a New Yorker's weekend in the Hamptons, Germans have chosen Sylt Island in the North Sea as their ideal destination for a short trip or holiday.

Roughly 40 kilometers of gorgeous beach property provide for exhilarating walks alongside the dunes and stormy sea, and high-quality restaurants filled with the freshest fish and fine wines will delight even a picky New Yorker's palate. Combined with art galleries, festivals and an unforgettable nightlife, Sylt Island has been known as "THE" spot since the 1970s. Stacks of yellowing newspaper articles chronicle the fact every German celebrity has been caught socializing here at least once in the past decade.

To accommodate the several million visitors per year, the island boasts a number of hotels in every category. *The newest and most impressive is Long Island House – Sylt. This young, energetic, and enormously detailed hotel is designed to reflect American/Long Island style. Every room has a distinct theme, with names like the Captain's Room, the Lighthouse and the Admiral's Room giving a slight clue as to what guests can expect. The high quality furniture and unique style embedded in every inch of the bedrooms and bathrooms create accommodations that demand inclusion in the final slide show of your trip.*

The love and passion put into this project by young hotel managers Martina Blum and Lars Poppe can be felt throughout the experience. Mornings begin with a high-class buffet in the bright, sunny restaurant, giving guests the opportunity to start their day with fresh juices, delicious fish and a variety of fruits and bread. As an additional token, guests are offered the chance to order any of the room accessories for their own homes.
